

**APPENDIX 1B**

**TO THE REGULATION**

**DECLARATION OF ACCEPTANCE OF THE RISK**

**AND RELEASE FROM LIABILITY**

**RACE AROUND POLAND**

**(Crew member)**

.....

First name, surname, address of residence, date of birth

In relation to admitting me as a support crew member in the *Race Around Poland* cycling race that will be organised on the route of approximately 3600 km in open road traffic through varied terrain, in weather conditions that are unknown upon the start of the Race, which is a continuous and multi-day event, and being entirely aware of the following:

- a) Cycling is a type of physical activity, which requires strong effort and focus, being inevitably associated with the risk of traumas, injuries, and even death as a result of an accident, including those resulting from circumstances connected to the health status, equipment or gear dysfunctions, failure to keep adequate care and caution by a participant or other persons, including volunteers and other individuals involved in organisation of the Race, violation of road traffic laws or other regulations, including violations committed by persons other than the participant, and participation in a cycling race like Race Around Poland leads to aggravation of such risks;
- b) As a racer's support crew member, I have a particular responsibility and duty to take special care to keep the racer safe, when riding and resting, prevent dangerous situations on the road and react to incidents that might occur during the Race;
- c) The route of the Race runs outside of a closed cycling track and the Organiser has no ability to close it for the traffic for the time of the event. During the Race I will be a part of normal road traffic with cars and other vehicles not involved in the event, as well as pedestrians, which means that I will bear the risk associated with this, including the risk resulting from circumstances beyond my control;
- d) The Organiser took every step to develop the rules of taking part in the Race in a manner that should ensure safe participation, but within the scope dependant on my actions or omissions I remain fully responsible for my own safety and possible consequences of my actions;

I hereby **knowingly and intentionally** declare that:

- a) **I accept the risk and release from liability** to the fullest extent permitted by applicable law, for all incidents related to my participation in the Race as a support crew member for a racer, the Organiser and all the persons and entities cooperating with the Organiser when conducting the Race, including volunteers, partners, and sponsors (hereinafter jointly referred to as *the Released from Liability*);
- b) The abovementioned release is also applicable in case of incidents before the Race and after the Race is completed, provided they were related to the Race;
- c) In view of the above, I will not pursue any claims of financial or non-financial nature against any persons listed as the Released from Liability.
