

Supplement WUCA Rules for inclusion to current event rules for 2023 Race Around Poland

WUCA supplement rules:

1. All follow vehicles must have two amber flashing rear roof mounted lights.
2. All follow vehicles must have "Caution Cyclist Ahead" rear mounted reflective graphic
3. All front mounted auxiliary lights must not exceed the height of the vehicle original headlights
4. RV / Campervans are NOT permitted as follow vehicles. RV / Campervans can be used by rider and crew as "resting car". However this vehicle can not be the riders service vehicle / follow vehicle because of its size. Also RV / Campervan need to be parked in locations off the race route, so safe for follow vehicle and rider to stop also at same position - not small lay-by on side of road where traffic is passing close.
5. Follow vehicles are to use "Leapfrog service" in daylight hours especially on busy roads, this stops traffic build up known as "Caravanning".
6. Mandatory - Vehicle direct follow during night time hours / e. g. 7pm to 7am
7. Food and drink feeding from the vehicle when traffic flow allows – not more than 30 secs beside the rider.
8. Mandatory - all service crew must wear HI- VIS vests at night – we recommend use them in daytime hours as well.
9. Mandatory - All bikes must have front and rear lights.
10. Mandatory – All bikes must have reflective tape on front forks, rear seat stays, each side of each crank arm and three locations on each side of each wheel.

Current RAP Rules

Rule 6 as per the current RAP listings is not relevant for supported World Championship race. No service intervention by the RAP organisers.
